EDUCATION

Cavite State University – Naic

Magna Cum Laude - 2026

B.S. in Computer Science, Senior

- Dean's Lister (2022-Present)
- Relevant Coursework: Data Structures and Algorithms, Object-Oriented Programming (OOP), Web Systems and Technologies, Advanced Database Management Systems, Software Engineering, Operating Systems, and Fundamentals of Information Systems

TECHNICAL SKILLS

Languages: HTML5, CSS3, JavaScript, TypeScript, PHP, Dart, Python

Frameworks & Technologies: React, Next.js, Vite, Node.js, Express.js, Flutter, React Native, Bootstrap, Tailwind CSS, Chakra UI

Database: MySQL, Firebase, Supabase

Tools, Platforms & Services: Git, GitHub, Figma, Vercel, Render, Cloudinary, Twilio, WordPress

AI / Machine Learning: TensorFlow, TensorFlow Lite, OpenCV, YOLOv8, Label Studio, Roboflow, Google Colab, Jupyter, Kaggle

PROJECTS

Smart Cook | HTML5, CSS3, Vanilla JavaScript, Edamam API

May 2024 – June 2024

Full Stack Developer

- **Smart Cook** is a recipe finder web app built with HTML5, CSS3, Vanilla JavaScript, and the Edamam API, allowing users to search for meals based on dietary needs like low-carb, keto, high-protein, and more.
- It provides detailed recipes with ingredients, nutrition facts, and cooking instructions, helping users discover healthy meal options tailored to their preferences.

Jayann's Store POS System | HTML5, CSS3, JavaScript, PHP, MySQL

December 2024 – January 2025

Full Stack Developer

- **Jayann's Store POS System** is a web-based platform built with HTML5, CSS3, JavaScript, PHP, and MySQL that functions like an e-commerce site—allowing users to browse products, add to cart, and checkout.
- Implemented dynamic recipe rendering with nutritional facts, ingredients, and cooking instructions to promote healthy food choices.

AlgoVerse | HTML5, CSS3, JavaScript, PHP

December 2024 – January 2025

Full Stack Developer

- **AlgoVerse** is a web-based tool built with HTML5, CSS3, and JavaScript that visually simulates various CPU scheduling algorithms for educational and testing purposes.
- It allows users to select from algorithms: FCFS, SJF, Priority (Preemptive/Non-Preemptive), SRTF, Round Robin, and Multilevel Queue, displaying process execution order and computing turnaround and waiting times.

ODCI (Document Tracker) | HTML5, CSS3, JavaScript, PHP, MySQL

August 2025 – September 2025

Full Stack Developer

- **ODCI (Document Tracker)** is a centralized document tracking system engineered collaboratively by a 3-person team during an On-the-Job Training (OJT) program.
- Implemented role-based access controls and a minimalistic dashboard for Superadmins, Admins, and Users to efficiently route, approve, and monitor the lifecycle of documents.

Seelai | Flutter, Firebase, TensorFlow Lite, YOLO, Node.js, React.js

October 2025 – April 2026

Full Stack Developer

- **Seelai** is an AI-powered mobile assistant and thesis proposal system designed to empower individuals with visual impairments through real-time environmental interpretation.
- Integrated machine learning computer vision models to provide accurate object detection and specialized caretaker's face detection for enhanced user safety.

Certifications & Webinars

- **Cognixia (May 18th, 2023)** – “Future of Containerization: How Kubernetes and Docker are Revolutionizing the IT Industry.”
- **DICT Region V – Bicol (May 18th, 2023)** - “Bicol Startup 101 of the Department of Information and Communications Technology.”
- **University of Caloocan City (May 20th, 2023)** - “Breaking Barriers in Web Development: Empowering Skills from Ground Zero.”
- **NIELIT– Delhi (May 25th, 2023)** – “GENERATIVE AI: FROM ChatGPT to AutoGPT.”
- **Filipino Web Development Peers (May 28th, 2023)** – “FWDP Monthly Community Day.”
- **KOENIG (October 25th, 2023)** – “From Data to Deployment - Building Machine Learning & AI Solutions with Microsoft Azure.”
- **KOENIG (October 28th, 2024)** – “Introduction to Oracle Exadata Machine.”
- **KOENIG (October 28th, 2024)** – “Artificial Intelligence - Driving Innovation and Business Transformation.”
- **Gordon College - SREGEN (November 23rd, 2024)** – “Mastering SQL Query Optimization: Boost Performance, Reduce Server Load.”
